RE: Response for completion of Permitting, Emery  
Industrial Resources, Inc., Cherry Hill Park Quarry  
M/049/012, Utah County, Utah.

Dear Mr. Hedberg,

As was stated to you in our phone conversation on 2-26-98, Emery Industrial Resources Inc. plans to reclaim a large portion of the Cherry Hill Park Quarry (see map enclosed) during 1998. Reclamation on this project is planned to commence in June 1998 with slopes and highwalls being backfilled, sloped and contoured to specs. Any topsoil will be spread and contoured to encourage seed germination when this area is seeded in fall 1998 probably in October due to the improved seed germination rates from wintering over in the ground. Any junk, trash, and/or scrap metal will be hauled away and/or buried at the site.

The current outlook for mining at the Cherry Hill Park Quarry has changed, and until the market for limestone products improves, Emery Industrial Resources, Inc. feels that reclaiming a large portion of said Quarry during 1998 is in it's best interest at this time, and further state that the expected proposed postmining land use for that area reclaimed will be for grazing purposes.

In that area adjacent to and North of that area proposed to be reclaimed the year, Emery Industrial Resources, Inc. plans to keep this area active.

If you have any questions and/or any additional information is needed, please specify this in any future communications and I will be glad to assist you.

Thank you.  
Sincerely,

Agent for Emery Industrial Resources, Inc.
